

Infor LX

We have the software solutions to meet all of your Infor LX needs depending on what version you are using. From green screen integration, to System-Link, Webtop, or Net-Link interface. We are able to provide you with a solution that will allow your data collection to continue with seamless real-time integration into whatever version of Infor LX you are on today or into the future.

Now with the release of our new *QuikTrac* 6.0 Browser version, we can now add GUI touch screens to your mobile data collection devices running Android os! With real-time integration into System-Link or Net-Link, your mobile data collection project will be implemented in 4 days or less!

Benefits:

- ✓ Fast Implementation
- ✓ Does not touch any of the backend code
- ✓ Integrates with multiple databases
- ✓ Supports Multiple languages
- ✓ Supports all legacy mobile devices
- ✓ Printing from any Infor LX screen

Key Features:

- ✓ Real time integration into Infor LX
- ✓ Allows user to develop and maintain their own data collection projects
- ✓ ODBC interface to external applications
- ✓ Ability to run API or stored procedures
- ✓ Off-Line Data Collection available

Customer Focus:

- ✓ Any Infor LX release including 8.3
- ✓ Integrates with System-Link, Webtop, and Net-Link interfaces
- ✓ Allows you to upgrade and do your own development in the future
- ✓ Works with any mobile device
- ✓ No custom coding, or .Net programming

Partial List of Transactions Available:

- ✓ SFC-650 Production reporting
- ✓ INV-500 Production issue
- ✓ PUR-550 Purchase order receipt
- ✓ JIT-600 Production reporting
- ✓ INV500CC-Cycle Count
- ✓ INV-510 Location transfer

Infor LX Success Story:

"We've designed *QuikTrac* so that the operator can put in the order they want to pick, and that triggers *QuikTrac* to reach into the LX databases via an ODBC connection to gather all of the information about that order, including items and quantities,"

"What *QuikTrac* has done for us is automated the recording of those inventory transfers within LX as we pick orders, the system validates those items and quantities are accurate according to the order within LX, while creating an order allocation saving us hours of manual input."
