Oracle Enterprise One

JD Edwards EnterpriseOne is an integrated applications suite of comprehensive enterprise resource planning software that combines business value, standards-based technology, and deep industry experience into a business solution with a low total cost of ownership.flexibility lets you do it all, quickly and easily. As your business changes, you can change your business system needs and your data collection should be as flexible.

With our new *QuikTrac* Browser interface for Enterprise One, we use Fast Path into Enterprise One to call menu options and process transactions. We do not integrate with any of the old traditional API calls, or backend integration. Our simple approach is thru the browser screen so changes are simple and fast giving you flexibility in your business growth. Enterprise One gives companies the tools they need to accelerate growth and drive innovation. Why shouldn't your data integration software be the same?

Benefits:

- ✓ Fast Implementation
- ✓ Does not touch any of the backend code
- ✓ Uses Chrome or IE browser
- ✓ Supports Multiple languages
- ✓ Supports all legacy mobile devices
- ✓ Printing from any Enterprise One screen

Key Features:

- ✓ Real time integration into Enterprise One
- ✓ Allows user to develop and maintain their own projects
- ✓ ODBC interface to external applications
- ✓ Ability to run stored procedures

Customer Focus:

- ✓ Any Enterprise One version
- ✓ Screen integration thru browser connection
- ✓ Allows you to upgrade and do your own development in the future
- ✓ Works with any mobile device
- ✓ No custom coding or API calls

Partial List of Transactions Available:

- ✓ Adjust Inventory
- ✓ Transfer Inventory
- ✓ Distribute Inventory
- ✓ Approve Transfer Order
- ✓ Order Items

NetSuite Success Story:

QuikTrac-Browser software solution will allow you to extend your Enterprise One software in real-time and eliminated hand writing down of transactions. Having a flexible software solution like Enterprise One gives you the ability to grow, but if your data collection software requires custom programming every time a new update comes out, you have lost your ability to maintain your own system.

Because we integrate at the screen level, you can make your changes to your system in minutes, not days!
