

# QuikTrac® 6

FROM INTEGRATED BARCODING

**QuikTrac® Browser** is the latest software that was designed to give our customers the technology to integrate with today's ERP systems. Most of the new software being developed today are using a browser interface so that their software can be accessed on any device anywhere.

**QuikTrac® Browser** gives us the ability to take your browser screen and create GUI user interfaces with Android mobile devices and deploy them out onto the floor. Having a GUI touch screen interface allows the users to be trained and using the product within minutes!

**QuikTrac® Browser** gives you Real-Time data integration with your host application so that your employee's can focus on their task at hand and not have to worry about writing down data, or waiting to upload at a later time. Works with any mobile data collection terminal to allow you to complete transactions like: receive, inspect, put-away, transfer, pick, ship, and print labels from any screen.

## **QuikTrac® Browser Benefits**

- Fast Implementation
- No Custom programming required
- Windows mobile 6.5, or Android devices running a VT emulation
- GUI touch screens for mobile devices
- Supports Multiple languages
- Real-Time integration into your host application

## **Key Features**

- Implementation in 4 days or less
- Real-time integration into Chrome, IE, browsers
- Add drop down menus and screens
- Customer can support their own solution

# Browser

## **QuikTrac® Browser Development Module**

The **QuikTrac®** Development Module allows you to develop, maintain and add functionality to your projects in hours without any host programming, custom coding, or programming classes to learn a new language. Our software allows **YOU** the ability to develop and maintain your own projects, and integrate them into your backend system for a total turn-key solution at one low price!

## **QuikTrac® Manager**

The **QuikTrac®** Manager allows you to set up, control, and monitor your data collection projects. The **QuikTrac®** Manager also provides you with another level of security by controlling who can access the system. **QuikTrac®** Manager gives you the ability to control users when they sign on, which group they access, and what screens they are able to use.

## **QuikTrac® Printing Module**

The **QuikTrac®** Printing Module allows you to print labels or receipts from any screen on your mobile device. Simple design tools allow you to create your own label or receipt.

## **QuikTrac® Device Requirements**

The system requirements for the mobile devices are: Windows Mobile 6 or higher, or android. Please contact us with your specifications.

## **QuikTrac® System Requirements**

Duo Core Processor with 8 Gig Ram, 40 Gig hard drive or higher, Windows 8, 10, Server 2012 or higher, or a virtual server.

Call Integrated Barcoding for more information or a web-demo. We will be glad to show you how fast and simple **QuikTrac® Browser** can work to get your data collection project running.
