

QuikTrac® 6 Browser

FROM INTEGRATED BARCODING

QuikTrac® Browser is the latest software that was designed to give our customers the technology to integrate with today's ERP systems. Most of the new software being developed today uses a browser interface so that their software can be accessed on any device anywhere.

QuikTrac® Browser gives us the ability to take your browser screen and create GUI user interfaces with Android mobile devices and deploy them out onto the floor. Having a GUI touch screen interface allows the users to be trained and using the product within minutes!

QuikTrac® Browser gives you real-time data integration with your host application so that your employees can focus on their tasks and not have to worry about writing down data or waiting to upload at a later time. Works with any mobile data collection terminal to allow you to complete transactions like: receive, inspect, put-away, transfer, pick, ship, and print labels from any screen.

QuikTrac® Browser Benefits

- Fast Implementation
- No custom programming required
- Windows mobile 6.5, or Android os
- Simple to use and deploy
- Supports multiple languages
- Real-time integration into your host application

Key Features

- Implementation in 4 days or less
- Real-time integration into Chrome and IE
- Add drop down menus and screens
- Customer can enhance their solution

QuikTrac® Browser Development Module

The **QuikTrac®** Development Module allows you to develop, maintain and add functionality to your projects in hours without any host programming, custom coding, or programming classes to learn a new language. Our software allows **YOU** to develop and maintain your own projects and integrate them into your backend system for a total turn-key solution at one low price!

QuikTrac® Manager

The **QuikTrac®** Manager allows you to set up, control, and monitor your data collection projects. The **QuikTrac®** Manager also provides you with another level of security by controlling who can access the system. **QuikTrac®** Manager gives you the ability to limit user access and control which transactions they can execute.

QuikTrac® Printing Module

The **QuikTrac®** Printing Module allows you to print labels or receipts from any screen on your mobile device. Simple design tools allow you to create your own label or receipt.

QuikTrac® Device Requirements

QuikTrac supports any mobile devices that can run VT Emulation and IP addressable.

QuikTrac® Minimum System Server Requirements

Duo Core Processor with 8G memory, 40G hard drive, Windows 8, 10, Server 2012, or a virtual server.

Call Integrated Barcoding for more information or a web demo. We will show you how fast and simple **QuikTrac® Browser** can work to get your data collection project running.
