Legacy IBM i ERP

There are many ERP solutions that are still being used by customers who have no intentions of ever going to a new ERP solution because they have modified the code to meet their specific needs. ERP solutions such as: Data3, MOVEX, PRMS, CMS, Global Software and highly customized IBM i solutions are hard to find a solution that will seamlessly integrate into without touching the existing RPG code.

Our *QuikTrac*-iSeries solutions allows you to integrate into your IBM i ERP solutions with no custom programming, no API calls, or an any back end code you have to modify. Our screen integration approach is a real-time integration into your ERP software. You can maintain your own system and make changes in minutes by simply click, drag, and drop your green screens and you are ready to go. Implementation of the hardware and software solution is done in 4 days or less!

Benefits:

- ✓ Fast Implementation
- ✓ Does not touch any of the backend code
- ✓ Integrates with multiple databases
- ✓ Supports Multiple languages
- ✓ Supports all legacy mobile devices
- ✓ Printing from any iSeries screen

Customer Focus:

- ✓ Any IBM i Green screen version
- ✓ Integrate with new Browser/cloud solution
- ✓ Allows you to upgrade and do your own development in the future
- ✓ Works with **ANY** mobile device
- ✓ No custom coding, or API calls required

Key Features:

- ✓ Real time integration into IBM i
- ✓ Allows user to develop and maintain their own data collection projects
- ✓ ODBC interface to external applications
- ✓ Ability to run stored procedures
- ✓ Off-Line Data Collection available

Partial List of Transactions Available:

- ✓ PO Receipt
- ✓ MO Receipt and Issue
- ✓ Inventory Adjustment
- ✓ Item Lookup
- ✓ Cycle Count
- ✓ Transfer

Legacy iSeries Success Story:

"*QuikTrac*-iSeries software allowed us to take our old Data3 software and extend it out into our manufacturing facility where we can do production reporting and inventory moves in real-time. This increased our accuracy from 65% up to 98% within our first 6 months and eliminated hours of manual keying of data into Data3.

We were able to implement this without touching any of our RPG code. Now I am able to make changes and add additional functionality thru *QuikTrac*-iSeries without taxing our corporate IT staff."
