

QuikTrac[®]

From Integrated Barcoding

ICS

QuikTrac-ICS was designed to give customers better control over their inventory without spending a fortune. **QuikTrac-ICS** is setup so that you can lay out your own warehouse the way you need it, and be up and running receiving and shipping your inventory at your warehouse within hours!

QuikTrac-ICS works with mobile data collection terminals to allow you to receive, inspect, put-away, transfer, pick, ship, and print shipping documentation in real-time. **QuikTrac-ICS** web interface allows you or your customer to view your inventory from your desk, or any remote location.

QuikTrac-ICS Benefits:

- Fast Implementation
- No Custom programming required
- Supports all TCP/IP data collection devices
- Printing from any handheld
- Supports Multiple languages
- Web based viewing of on hand inventory

Key Features:

- Setup your warehouse to meet your needs within hours
- Real-time integration into any ODBC database solution for seamless host integration
- Lot control: FIFO, or LIFO
- GUI touch screen mobile devices
- Location inquiries/Item inquiries

Customer Focus:

- you can develop and support your own solution
- Allows you to add functionality to your ERP solution Without custom modifications.
- Web based inventory ordering and viewing
- Stand-alone solution that can integrate with any software package on the market today

Partial list of transactions available:

- Receipt/Verify to PO
- Receipt to Dock
- Transfer
- Misc. Issue
- Cycle Counting/Physical Inventory
- Stage and move Inventory
- Pick, Pack, and Ship
- Label printing/Reprinting
- Item inquiry

Success:

"*QuikTrac*-ICS allowed me to have a stand-alone Inventory Control System to manage my warehouse at a fraction of the cost of most other systems. My customers can get online and place their orders and view their inventory right from their own office"

Dan Prominski – Warehouse Supervisor QTL Logistics
